

Overview of the Action Learning Programme

The “Why” Behind SPECTRA: The Case for Change

This 30-minute session will be led by a local asthma lead facilitated by AstraZeneca

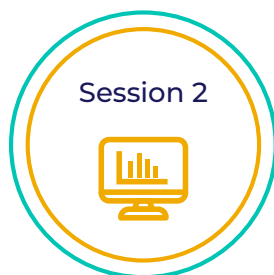

Objectives

1. Focus on the burden of severe asthma for patients and the NHS
2. Understand the barriers to accessing severe asthma care
3. Explore data and insights on the burden of uncontrolled asthma and potential severe asthma in your area
4. Introduce SPECTRA at Scale: A population health approach to identifying uncontrolled and suspected severe asthma patients

Utilising SPECTRA Searches to Create a Report

This 1 hour session will be led by an Oberoi Service Implementation Manager

Objectives

1. Know the search rationale and which patients are identified
2. Understand the key features of the SPECTRA searches
3. Understand the benefits of Practice/PCN/ICB level reporting
4. Know how to import/locate the SPECTRA searches
5. Know how to create SPECTRA baseline & follow-up reports

Overview of the Action Learning Programme (cont.)

Utilising SPECTRA Resources to Triage Patients

This 1 hour session will be led by an Oberoi Service Implementation Manager

Objectives

1. Understand the SPECTRA Alert rationale and which patients' electronic records are triggered
2. Explore an asthma medication review template available to support clinical reviews
3. Know the coding to apply to patient records who have been reviewed and/or referred
4. Understand the purpose of the SPECTRA Referral Extract Template
5. Know how to import the SPECTRA Referral Extract Template within your clinical system
6. Understand how to use the SPECTRA Referral Extract Template to support referral of patients

Identification, Management & Referral of Patients with Suspected Severe Asthma

This 45-minute session will be led by a local severe asthma lead, facilitated by AstraZeneca

Objectives

1. Support you to provide high quality asthma reviews for patients identified by SPECTRA
2. Help you to identify high risk patients & assess which patient to refer to specialist severe asthma services
3. Provide an overview of treatments and services offered by severe asthma services to improve asthma-related outcomes
4. Explore the local severe asthma referral pathway so that you and your patients know what to expect
