

## PCN Level Dashboard Example

This example shows dashboards from uploaded search files from participating practices across a PCN.

Dashboards enable PCNs to compare and measure the impact of SPECTRA across their practices.

The data-driven insights help healthcare professionals to make informed and targeted interventions along with understanding the resource allocation required.

Benchmarking allows healthcare organisations to measure the quality of care they provide against national standards.

### Dashboard for 3 practices in EXAMPLE PCN (100000)

Out of the 3 practices, within EXAMPLE PCN, who are active in the SPECTRA programme, 3 practices have uploaded follow-up search results and are represented in the calculations in the paragraphs that go with each plot below.

#### Patients on Asthma Register Aged 18 and Over

There are currently 1,783 patients (5.66%) with Asthma aged 18 and over, compared to 1,783 patients (5.66%) at baseline, in the 3 practices in EXAMPLE PCN which have uploaded follow-up search results. Patient numbers between 1 and 7 are suppressed, aligned to NHS England's approach to suppression of small patient counts\*\*, so the collated numbers in the paragraph text above may not match the total count in the bar plots.

Plotted data can be toggled on/off by clicking on the relevant colour, or text, in the legend situated underneath each chart. Each bar can also be hovered over to see information specific to that practice.

An double asterisk (\*\*) next to a practice's name means that only their initial search results have been uploaded and they are not included in the calculations in the paragraphs accompanying the plots.

#### Patients Coded with Severe Asthma

In the 3 practices in EXAMPLE PCN which have uploaded follow-up search results, there are currently 29 patients coded with Severe Asthma, compared to 29 patients at baseline.

Patient numbers between 1 and 7 are suppressed, aligned to NHS England's approach to suppression of small patient counts\*\*, so the collated numbers in the paragraph text above may not match the total count in the bar plots.

Plotted data can be toggled on/off by clicking on the relevant colour, or text, in the legend situated underneath each chart. Each bar can also be hovered over to see information specific to that practice.

Adult Asthma Patients on Inhaled Corticosteroids (ICS)  
Patient Cohorts A & B

**Cohort 1:**  
Adult asthma patients on **high strength inhaled corticosteroids (ICS)\***

**Priority 1a**  
Cohort 1 patients with **serious exacerbations (at least one hospital admission)**  
**OR**  
**2 or more exacerbations\*\***

**Priority 1b**  
Cohort 1 patients who have had **2 or more issues\*\*** of systemic corticosteroids\*

**Cohort 2:**  
Adult asthma patients on **all other ICS\* strengths**

**Priority 2a**  
Cohort 2 patients with **serious exacerbations (at least one hospital admission)**  
**OR**  
**2 or more exacerbations\*\***

**Priority 2b**  
Cohort 2 patients who have had **2 or more issues\*\*** of systemic corticosteroids\*

\* Click here to read the "Search Criteria" for a full list of drugs  
\* No referral in the last 12 months or current biologic \*\* In the last 12 months

In the 3 practices in EXAMPLE PCN which have uploaded follow-up search results, there are currently a total of 121 patients for review in the 'a' cohorts and a total of 129 patients patients in the 'b' cohorts, while at baseline there were 121 patients & 129 patients respectively.

Patient numbers between 1 and 7 are suppressed, aligned to NHS England's approach to suppression of small patient counts\*\*\*, so the collated numbers in the paragraph text above may not match the total count in the bar plots.

Plotted data can be toggled on/off by clicking on the relevant colour, or text, in the legend situated underneath each chart. Each bar can also be hovered over to see information specific to that practice.

Adult Asthma Patients on Inhaled Corticosteroids (ICS)  
Patient Cohorts C & D

**Cohort 1:**  
Adult asthma patients on **high strength inhaled corticosteroids (ICS)\***

**Priority 1c**  
Cohort 1 patients who have had **6 or more issues\*\*** of reliever inhaler\*

**Priority 1d**  
Cohort 1 patients with **"Poor Symptom Control" coded\*\***  
**OR**  
latest asthma control test (ACT) < 20

**Cohort 2:**  
Adult asthma patients on **all other ICS\* strengths**

**Priority 2c**  
Cohort 2 patients who have had **6 or more issues\*\*** of reliever inhaler\*

**Priority 2d**  
Cohort 2 patients with **"Poor Symptom Control" coded\*\***  
**OR**  
latest ACT < 20

\* Click here to read the "Search Criteria" for a full list of drugs  
\* No referral in the last 12 months or current biologic \*\* In the last 12 months

In the 3 practices in EXAMPLE PCN which have uploaded follow-up search results, there are currently a total of 443 patients for review in the 'c' cohorts and a total of 201 patients patients in the 'd' cohorts, while at baseline there were 443 patients & 201 patients respectively.

Patient numbers between 1 and 7 are suppressed, aligned to NHS England's approach to suppression of small patient counts\*\*\*, so the collated numbers in the paragraph text above may not match the total count in the bar plots.

Plotted data can be toggled on/off by clicking on the relevant colour, or text, in the legend situated underneath each chart. Each bar can also be hovered over to see information specific to that practice.

**Impact of the Review and Referral Process Across EXAMPLE PCN**

**Patients Reviewed Since Baseline**

In the **3 practices** in **EXAMPLE PCN** which have uploaded follow-up search results, there are a total of **135 patients** who have been **reviewed** since baseline.

The accuracy of the charts below is dependent upon the correct coding, by each practice, of their patients that are "Reviewed", using the coding referenced within the SPECTRA practice reports.

Patient numbers between **1 and 7** are **suppressed**, aligned to NHS England's approach to suppression of small patient counts\*\*, so the collated numbers in the paragraph text above may not match the total count in the bar plots.

**Patients Referred Since Baseline**

In the **3 practices** in **EXAMPLE PCN** which have uploaded follow-up search results, there are a total of **26 patients** who have been **referred** since baseline.

The accuracy of the charts below is dependent upon the correct coding, by each practice, of their patients that are "Referred", using the coding referenced within the SPECTRA practice reports.

Patient numbers between **1 and 7** are **suppressed**, aligned to NHS England's approach to suppression of small patient counts\*\*, so the collated numbers in the paragraph text above may not match the total count in the bar plots.
